Subject: Re: MDE MSGP final edits in track changes

Michelle,

I cannot officially speak on Ed's behalf, but based on the only language that was edited is the portion that you and I thoroughly discussed, I don't anticipate any further changes to your suggestions prior to publishing the TD Notice. If anything comes up we will get back with your team to work it out. I do want to thank you and your team for working on this permit and fact sheet and providing the valuable edits and improvements that you were able to provide. Thank you and if we don't talk again in the near future, have a wonderful and safe holiday season.

Hello Ed,

Attached to this email are targeted revisions for the draft versions of the permit and fact sheet for the MSGP that Paul shared with EPA on November 13, 2020. The targeted revisions, that we discussed and coordinated with Paul are attached and can be found in track changes on page 13 of the permit and page 43 of the fact sheet.

If MDE agree with these revisions.... EPA concurs on the attached draft final documents and MDE can proceed to tentative determination. Please let me know how MDE will proceed.

Should you have any questions, please reach out to Liz Ottinger on my staff, who is copied on this email

I do want to thank Paul for taking the time to speak with me last week so that we could work through the remaining needed clarification found in these drafts.

Sincerely,

Michelle
